

# Towards 'Authentic Belonging': Exploring the Concept and Enhancing Practice

Dr Christine Haddow &  
Dr Jackie Brodie

Edinburgh Napier  
UNIVERSITY

# Defining Community and Belonging

- Belonging has been defined as...
  - a “dynamic, relational and nonlinear process” (Raaper, 2021, p. 593)
  - a process of learning ‘to be’ (Groves & O’Shea, 2019)
  - a series of support needs to be met through interactions (Strayhorn, 2012)
  - See: Tinto’s (1993) integration model
- Community: “the most essential elements of community are spirit, trust, mutual interdependence among members, connectedness, interactivity, shared values and beliefs, and common expectation.” (Rovai & Wighting, 2005, p. 101).
- Do we need to reframe these concepts? (Gravett & Ajjawi, 2022)

# The Challenge of Community and Belonging

- Enhancing belonging and community in HE has emerged as an area of thematic priority (Campbell, 2019; Gopalan et al., 2021).
  - At institutional level
  - At sector level (e.g. Advance HE, QAA Scotland)
  - In research/SOLT

Year	Overall Satisfaction	Q21: Part of a community of staff and students
2017	80%	61%
2018	74%	58%
2019	79%	60%
2020	86%	68%
2021	81%	61%

# Belonging and the COVID-19 Pandemic

- Distance learners may not always value a sense of belonging. (Brodie & Osowska, 2021)
- Significant challenges to student wellbeing in the COVID-19 Pandemic and the rapid shift to online learning (Nurunnabi et al., 2020; Scoulas, 2021)
- Belonging as a ‘solution’? (Knight et al., 2021; Gopalan et al., 2021)
- “As the post-pandemic academic world rebuilds itself, we will need to get serious about communicating diversity, inclusion and belonging” (Passantino, 2021, p.583).

# Edinburgh Napier's Approach to Belonging Enhancement

- QAA Enhancement Themes 'Evidence for Enhancement' (2017-2020) as a catalyst to explore and innovate.
- Suite of funded 'mini projects'.
- Evaluated through semi-structured interviews with project leads in 2020.

Participant	Project	Participant	Project
A*	Languages Magazine	H*	Belonging in Social Sciences
B†	Student Societies Video	I*	SEM Law Students
C*	Film Club	J*	Feedback Experiences
D*	Belonging Online	K†	Feedback Experiences
E*	Design Studio Redesign	L*	Improvisation in Music
F*	Design Reading Room	M*	Lab Stars
G*	Men into Nursing		

\* Staff † Student

# What Works in Enhancing Community and Belonging?

## Student Ownership

“Students have really taken to the idea of ‘owning’ the space and have been collecting and donating their own resources.”(Design Reading Room Evaluation Form)

## Staff Facilitation

“It’s a kind of gardening process... it’s about creating the right environment for that community to flourish.” (F, Staff)

## Small Scale Development

“That is why the small-scale things probably work. Because they are the possible, you don’t try and over cook it.” (Staff, J)

# Authenticity

- Authentic learning: “to align university teaching and learning more substantially with the way learning is achieved in real-life settings” (Herrington & Herrington, 2006, p. 3).
- Authentic relational pedagogies (Gravett & Winstone, 2022)
- A ‘one size fits all’ approach to belonging can be tokenistic and homogenising (Graham & Moir, 2022)

“I don’t think you can artificially make a community, like a wee greenhouse pot plant... it needs to be something that you believe in and the students believe in, and they see as a genuine group and a genuine relationship that actually has meaning.” (L, Staff)

# Towards 'Authentic Belonging'

<b>Student Ownership</b>	<b>Staff Facilitation</b>	<b>Small Scale Development</b>
<p><i>Consult with Students</i></p> <p>Hold focus groups, workshops or coffee chats to gain a better understanding of the belonging needs of your student cohort.</p>	<p><i>Support, Don't Lead!</i></p> <p>Allow students to drive the direction of innovations. Avoid imposing your view or experience of communities on them.</p>	<p><i>Start Small</i></p> <p>Begin by establishing an enhancement project with minimal resource and time requirements, then explore how it could be expanded.</p>
<p><i>Bring Students Together</i></p> <p>When planning innovations, encourage students to form committees, identify tasks and delegate roles to drive the project forward.</p>	<p><i>Identify Opportunities</i></p> <p>Think about when students come together in your curriculum, and how activities can be implemented to build community at these points.</p>	<p><i>Funding and Resources</i></p> <p>Identify funding opportunities to support your enhancement activities, capitalise on small pots of money available within your institution.</p>
<p><i>Empower students</i></p> <p>Support students to make decisions about their communities, e.g. where and when they meet, the activities they involve.</p>	<p><i>Get the Word Out</i></p> <p>Support students' community development activities by publicising them via course mailing lists, social media pages, and blogs.</p>	<p><i>Plan Timings Carefully</i></p> <p>Factor in the rhythm of the academic year, and the availability of students across this, when setting out timescales for innovations.</p>
<p><i>Inspire Collaboration</i></p> <p>Suggest that students reach out to other cohorts, e.g. student societies, other programmes, to expand their communities.</p>	<p><i>Share Practice</i></p> <p>Draw on existing research and share examples of belonging enhancement with students and colleagues. Allow them to see what can be done.</p>	<p><i>Evaluate</i></p> <p>Take time to evaluate any initiatives you put in place. Collect student feedback and share the findings with the community.</p>
